CervicalCheck

AN CLÁR NÁISIÚNTA SCAGTHÁSTÁLA CEIRBHEACS
THE NATIONAL CERVICAL SCREENING PROGRAMME

- Offers free cervical screening to almost 1.2 million women (aged 25-29 every 3 years, and aged (30-65 every 5 years).
- CervicalCheck moved to HPV cervical screening in March 2020.
- HPV cervical screening is a better way of screening for cervical cancer, prevents more cancers and means some people will need fewer tests.
- Screening can be carried out at any registered GP practice or clinic (over 4,500 nationwide).
- A cervical screening test checks the health of your cervix.
- Aims to detect cervical cancer at the earliest possible stage, when it is easier to treat.
- Cervical screening is not a test for cancer, it's a test to see if you are at risk of developing cancer.
- Most cervical screening test results are normal.
- Over 3 million cervical screening tests provided since 2008.
- Over 130,000 abnormalities detected up to year 11, many of which could have developed into cervical cancer.
- 18 out of 20 people will have abnormal cells found through new HPV cervical screening.
- Women with concerns or symptoms should visit their GP.

BowelScreen

An Clár Náisiúnta Scagthástála Putóige
The National Bowel Screening Programme

- Offers free home bowel screening for approximately 250,000 men and women aged 60 to 69 every 2 years.
- Aims to find bowel cancer or pre-cancerous changes at the earliest possible stage, when they are easier to treat.
- A home test is sent directly to the person's home if they are on our register and have consented to receive it.
- The screening test is a simple way to check for small amounts of blood in your stool (poo).
- Most home bowel screening test results are normal.
- BowelScreen has detected over 1,200 cancers since 2012.
- Detected and removed almost 34,000 pre-cancerous growths, that could have developed into bowel cancer.
- Over 2,800 people diagnosed in Ireland with bowel cancer in 2019/20.
- Bowel cancer is the third most common cancer in men and the fifth most common cancer in women.
- Anyone with concerns or symptoms should visit their GP.

Diabetic RetinaScreen

An Clár Náisiúnta Scagthástála Reitiní do Dhiaibéitigh
The National Diabetic Retinal Screening Programme

- Offers free diabetic retinopathy screening for people with Type 1 or Type 2 diabetes, aged 12 and over.
- Aims to detect and treat diabetic retinopathy at an early stage, to reduce damage to a person's sight.
- Diabetic retinopathy is a complication of diabetes affecting the blood vessels in the retina at the back of the eye.
- Detected retinopathy in over 5,000 people since 2013.
- Screening is done using special digital photography at over 100+ screening clinics nationwide.
- Anybody with Type 1 or Type 2 diabetes is at risk.
- Appointment time and date can be changed easily.
- An appointment takes about half an hour.
- Anyone with concerns or symptoms should visit their GP.
- **For more information Freephone 1800 45 45 55 or visit www.diabeticretinascreen.ie**

- It is important to attend your free screening test when you are invited.
- We continue to emphasis to our participants that the four screening programmes are for well people within the population age range and is not a symptomatic service.
- If a person has any concerns or symptoms, we strongly encourage them to contact or attend their GP to ensure that they are given the appropriate advice or referral.
